Select
2 to 8 different product families
from the list on the left
and get interesting discounts

Suites are Created by Selecting Different Product Families

- For each product family, choose the software version you need (Basic, Reg, Pro, Arabidopsis or Density)

Advantageous Discounts Offered

- The larger software Suite you buy, the bigger the discount

High Quality Hardware Recommended Depending on the Software Suite

- Calibrated optical scanners with special lighting system for accurate scientific measurements of thick samples such as roots, seeds, and needles
- Several software programs of a Suite can share the same scanner
- Positioning systems with trays, and wood core holders for easy and efficient scanning
- Blue reflectance target for wood density analysis
- Portable imaging and calibration Kit available for leaf image acquisition with a camera (camera not included)
- Self-leveling mount with compact DSLR camera and calibrated fisheye lens for canopy analysis

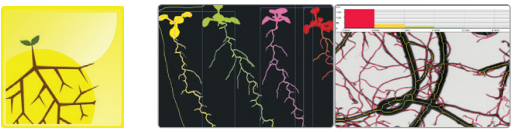
REGENT INSTRUMENTS Image Analysis for Plant Sciences

New 2022 Software Programs Available Now!

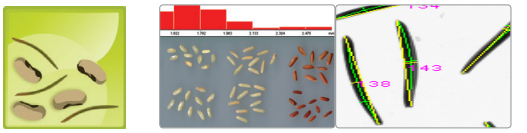
WinRHIZO™
Analyser of Washed Roots and Arabidopsis Seedlings



WinRHIZO™ Tron
Interactive Analyser of Images of Roots Growing in Soil

WinFOLIA™
Leaf Area Meter and Morphological Analyser

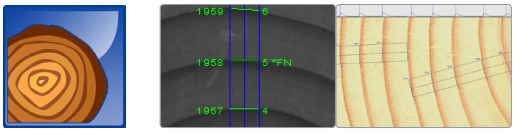
WinSEEDLE™
Seed and Needle Morphological Analyser and Counter



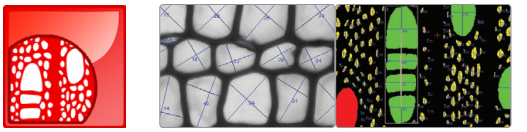
WinSCANOPY™
Analyser of Canopy Structure and Solar Radiation

WinCAM NDVI™
Color Area Meter, NDVI & Basic Morphological Analyser

WinDENDRO™
Tree-Ring and Wood Density Analyser



WinCELL™
Analyser of Wood-Cell Structure Parameters



At Least 5 Good Reasons for Choosing our Products:

1 Perpetual Software Licences
- No need to budget licence renewals each year
- Use our products as long as you wish
- No activation and no internet connection required
- 32-bit and 64-bit versions included with each licence

2 Frequent updates
- Stay up to date with new trends and features
- Update or upgrade software programs anytime
- Available even for old licences bought in 2000

3 Free Technical Support
- Prompt since 1991
- Available via email
- Provided by our competent engineers

4 High Quality Hardware
- Optical scanners calibrated for accurate scientific measurements
- Special lighting system for thick samples, e.g. roots, seeds, needles
- Positioning systems with trays and wood core holders for easy and rapid scanning of samples
- Blue reflectance target for wood density analysis
- Several software can share the same calibrated scanner and accessories
- Self-leveling mount with compact DSLR camera and calibrated fisheye lens for canopy analysis

5 New Advantageous Discounts
- The more software programs you buy, the bigger the discount
