

At Regent Instruments we design, develop and manufacture high performance image analysis tools for plant and forest sciences!

Our Eight Product Families are offered to scientists worldwide

Perpetual Software Licences

- No need to budget licence renewals each year
- Use our products as long as you wish
- No activation and no internet connection required
- 32-bit and 64-bit versions included with each licence

Frequent Updates

- Stay up to date with new trends and features
- Update or upgrade your software programs anytime
- Available even for old licences bought in 2000

Free Technical Support

- Prompt since 1991
- Available via email
- Provided by our competent engineers

High Quality Hardware

- Color optical scanners calibrated for accurate scientific measurements
- Special lighting system for thick objects, e.g. roots, seeds, needles
- Positioning systems with trays and wood core holders for easy and rapid scanning of samples
- Blue reflectance target for wood density analysis
- Self-leveling mount with compact DSLR camera and calibrated fisheye lens for canopy analysis
- Several software can share the same calibrated scanner and accessories

Software Suites

- Advantageous when more than one product is needed
- The more software products you buy, the bigger the discount
